## INSTALLATION INSTRUCTIONS

FL5053

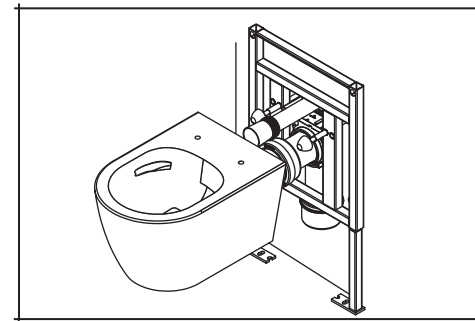

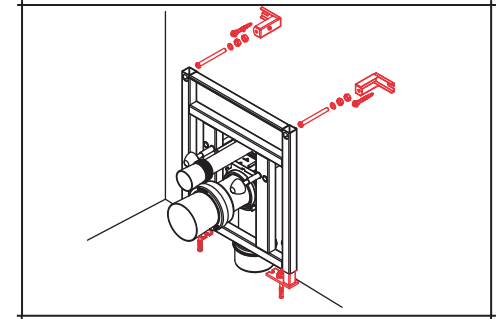

saneux

Before commencing installation, ensure all components are present and check the dimensions of the selected pan, cistern and furniture unit against the fitting dimensions of this frame.

Measure the desired height of the WC and extend the frame accordingly. Ensure the securing nuts are fully tightened.

Mark the location of the fixing holes and drill the wall and floor. Using the fixings provided, secure the frame to the wall and floor.

Install the cistern and pan, following their installation instructions. Make sure the pan is tightly fitted and test the system to ensure there are no leaks.
