

BATHS & SHOWER TRAYS

AFTERCARE INSTRUCTIONS

Baths and shower trays should be cleaned regularly with warm soapy water. It is advisable that the product should be cleaned immediately after use, rinsed with cold water and, for a long-lasting shine, dried with a soft cloth. Care should be taken especially with acrylic surfaces as they are softer than enamel or ceramic products and abrasive cleaners or cloths will scratch the surface.

Should the bath or tray require a stronger cleaner, especially in a hard water area, a suitable cleaner can be used according to the instructions. Contact with other household chemicals such as hair dyes, bleach, disinfectants, perfumes, and nail varnishes & removers should be avoided and should be washed off immediately if they get into contact with the product.

Some soaps and shampoos can discolour acrylic if they are left neat on the surface. Children's toys can sometimes use paints and dyes that can mark the acrylic surface. These and minor scratches can be polished out with "T-cut" or a similar product.

GUARANTEE

There is a 5-year guarantee on all baths supplied by **Saneux** against manufacturing defects. There is a lifetime guarantee on all stone resin shower trays supplied by **Saneux** against manufacturing defects.
