

# FLUSHING SYSTEMS

## AFTERCARE INSTRUCTIONS

Do not introduce caustic chemical substances (e.g. containing chlorine compounds or similar) as these may damage the valve components and cause failure. If the outside of the fill valve has calcium and mineral build-up; clean the valve by using vinegar and an old toothbrush to dissolve and break off the build-up on the surfaces of the fill valve. Then wash the valve with warm soapy water and then rinse with fresh water. To clean the flush plate or flush button, clean with warm soapy water and dry with a microfibre cloth.

## GUARANTEE

There is a 5-year guarantee on concealed cisterns and a 2-year warranty on their internals and working parts supplied by **Saneux** against manufacturing defects. It is the responsibility of the individual installer to ensure that these products are fitted correctly and in line with the installation instructions provided. Failure to comply with the recommended installation instructions will invalidate the guarantee.
